Program Description

Meta House specializes in serving **women** who want to overcome their substance abuse and build a good life for themselves and their children. To recover from the effects of alcohol and drug abuse, the staff at Meta House is ready to help women with every part of their lives including jobs, housing and parenting. Therefore, we provide services that will not only help our clients stop using alcohol and drugs, but will help them and their family build a better life together. Meta House's Vocational/Educational Services Department provides an array of services designed to assist women with the acquisition of skills and work habits necessary to gain and retain employment. There are two levels of care available to women, depending on their individual needs:

Residential Treatment Program. Our residential program is for women who need the structure that comes from living in a supportive community for 24 hours per day, seven days per week, with other women who are trying to overcome substance abuse. Women can bring their **children** (10 and under) to live with them in the residential treatment facility. In addition to addressing the mother's needs, we also assess and provide services for their children. Meta House has special programming, overseen by a full-time Registered Nurse (RN), to serve **pregnant** women and their babies.
